PROFESSIONAL SUMMARY

Computer Science Engineering student specializing in AI and Machine Learning, with skills in data analytics and full-stack web development. I build data-driven solutions and interactive web applications using JavaScript, Python, SQL, Excel, Power BI, React, Node.js, Express.js, and MongoDB. My interests include data visualization, machine learning, analytics, and scalable software development.

TECHNICAL SKILLS

Programming Languages:	JavaScript, Python, C, Java
Data Analytics & BI:	Microsoft Excel, SQL, Power BI, Data Visualization
Data Science & ML:	NumPy, Pandas, Data Cleaning, Exploratory Data Analysis (EDA)
Full Stack & Web:	React.js, Node.js, Express.js, HTML5, CSS3, REST APIs, WebSockets / Socket.IO
Databases:	MongoDB, MySQL
Core CS & Developer Tools:	Data Structures & Algorithms (150+ problems solved), Git, GitHub, VS Code

FEATURED PROJECTS

Indic Bias Detection System | *MERN Stack, Python, NLP, Machine Learning* — **Academic / Research Project**

A full-stack platform designed to analyze Indic-language content and identify potential stereotypical bias using machine-learning techniques.

- Implemented text preprocessing and NLP classification workflows for Indic dialect and textual nuances.
- Developed responsive MERN-based web application with interactive dashboard and prediction-result visualizations.

Smart Traffic Management System (STMS) | *React.js, Node.js, Express.js, MongoDB, Socket.IO, ML* — **Full-Stack Analytics**

A data-driven traffic monitoring platform designed to visualize urban traffic conditions and support traffic-flow analysis.

- Built real-time dashboard updates with Socket.IO and color-coded congestion levels (Low, Medium, High).
- Integrated interactive charts, traffic-load prediction, congestion forecasting features, alerts, scenario simulation, and CSV export.

E-commerce Sales & Customer Analytics | *Excel, SQL, Power BI, Data Visualization* — **Data Analytics**

An analytics project focused on understanding e-commerce sales performance, customer behavior, and purchasing patterns.

- Executed end-to-end data cleaning, EDA, revenue and average order value (AOV) analysis using SQL joins and aggregations.
- Conducted customer segmentation by purchase frequency and spending; created interactive Power BI dashboards delivering product and retention insights.

EDUCATION

Rungta College of Engineering and Technology, Bhilai — **2023 – 2027**

B.Tech in Computer Science Engineering (AI & ML) — **Bhilai, CG**

Pavanagar Mahavir Inter College, Fazilnagar, Kushinagar

Class XII — **UP, India**

CERTIFICATIONS & ACHIEVEMENTS

- **MERN Full Stack Developer** — Coding Spoon — **January 2026**
- **Data Science with Python** — LetsUpgrade — **June 2025**
- **Introduction to MS Excel** — Simplilearn SkillUp, powered by Microsoft — **July 2025**
- **Problem Solving:** Solved **150+ Data Structures & Algorithms problems** across online platforms. — **Consistent Practice**
